ALL YOUR COMPRESSED AIR NEEDS CAN NOW BE PROVIDED LOCALLY

Premiair Solutions Ltd is available to assist you with all your compressed air and pneumatic requirements and better still we are on your doorstep. With over 40 years experience within the compressed air industry we are a local company that is providing a range of equipment and services to an established customer base throughout East Anglia.

Premiair Service

 Premiair sales and service engineers are in your area daily and have the ability, experience and expertise to advise and assist you in all aspects of your individual requirements, providing an integrated approach based on value and service.

Our Premiair commitment to you is that we will:

 *Provide a prompt and efficient response to any compressed air/pneumatics requirements or enquiries you have*

 *Offer free advice on your existing system and identify potential cost savings*

 *Inform you of the 7 most costly mistakes made by compressed air users and assist you to overcome them*

 *Provide a Premiair service to you that is second to none*

Premiair News

 **Cheers!**
Premiair toast the completion of a £70,000 project for Greene King Brewing Co.

Premiair Solutions has recently completed and commissioned a new, large compressed air system for Greene King at their Bury St Edmunds site.

Greene King has operated pubs and brewing for over 200 years. Combining successful traditional ale brands with modern forward thinking, Greene King has grown steadily from its base in Bury St Edmunds, Suffolk to become a leading pub retailer and brewer.

The Greene King Brewing Co. is the division responsible for the marketing, sales, production and distribution of the firms quality range of ales and beers, including four of the country's best-known cask brands – Greene King IPA, Abbot Ale, Old Speckled Hen and Ruddles County.

Having worked closely with Greene King over many months, Premiair Solutions were awarded a £70,000.00 contract to supply and install a new HPC compressed air system. The new energy efficient package has already reduced operating costs, increased reliability and improved system performance.

Interest Free Loans Help Local Engineering Firm

 *When Warren Services of Thetford wanted to invest in the latest energy saving compressed air equipment, Premiair Solutions were on hand to provide some very valuable information and advice.*

For more than a decade Warren Services Limited have delivered a reliable quality precision and production engineering service within Europe.

Recently the company invested in an ambitious project to purchase and totally refurbish a large factory in Thetford that would underpin their substantial expansion. This major project was necessary due to expanding order books and a need for both more capital equipment and more skilled staff.

Founder and current Chairman, Richard Bridgman, explains.

“At Warren Services our team of long serving skilled engineers, as well as our

own trained apprentices, provide an extensive range of manufacturing solutions. From CNC and conventional milling and turning to welding and other related processes.

We are capable of long and short batch production as well as the manufacture of prototypes and copycat parts”.

An important part of the company's expansion plans was a new, energy efficient compressed air system that would provide a reliable source of quality compressed air.

As their local compressed air specialist, Premiair Solutions not only provided a package of equipment that would reduce energy costs, but suggested and arranged an **UNSECURED INTEREST FREE Energy Efficiency loan** from the Carbon Trust. Available to eligible small and medium sized organisations,

the loan allowed Warren to invest in the energy efficient HPC equipment without having to draw on their own funds and reduced their energy bills immediately. Further savings were also realised by claiming Enhanced Capital Allowances against the equipment.

Richard Bridgman comments, “Premiair did us a real favour introducing us to the Carbon Trust as we have been able to secure several other loans for our lighting and heating. Their help, advice and professional service has been invaluable and we are extremely grateful”.

 *Marshall Aerospace, based on its 800-acre Cambridge site, boasts a dedicated work force of over 1500 people and a unique range of facilities and equipment including its own airport.*

Committed to providing world class aerospace solutions through world class service, Marshall offer a broad range of aircraft services on different aircraft types, from line maintenance to full avionics upgrades. An important factor in the ongoing success of the company is an effective and reliable compressed air system provided and maintained by Premiair Solutions. The project included removing several large, old piston compressors and replacing them with the latest HPC energy efficient direct drive rotary screw compressors that included a compressor control and management system.
